

## Intake, reception and storage of feedstuff

### **Description**

Stale, admixture, strange parts, mould, all kinds of matter of which can be observed at a good entrance control. Already during reception many problems can be prevented or minimized. For a correct final product a good entrance control of the received raw materials is therefore of crucial importance. For a good entrance control it is important to understand why some matters are of such great importance. For this reason is also properties, hazards and applications of the most important raw materials are discussed. Storage of raw materials in such a way that the quality does not deteriorate requires specialist skills. A good knowledge of the principles and models for the storage of raw materials is therefore important. In addition, many problems can be avoided or reduced as early as at the intake of raw materials. Therefore this course deals, in addition to the characteristics, risks and applications of grains, with the theories behind the storage of raw materials, which theories are then translated into practice.

The following subjects are dealt with in this course:

- storage forms of raw materials
- aeration and ventilation techniques
- cooling
- intake method
- organoleptic inspection

### **Learning objective**

In this course the behaviour in storage will be discussed for the most frequently used raw materials and the effects of various storage forms will be examined. The prevention of problems by means of a good intake inspection will be dealt with as well. After the course you will know what to pay attention to in the storage of raw materials to assure quality.

### **Target group**

Intended for operators, silo bosses, raw materials receivers who are charged with the intake and storage of raw materials and auditors.

### **Language**

This course will be given in Dutch and/or English

### **Dates and locations**

Date : 10 May 2012  
Location : a location which is central for the participants  
Time : 9.00-12.30 hrs

This course is also suitable for being given in-company.

Fill in the registration form (see below). We will be glad to prepare a suitable quotation for you.

### **Price**

€ 305,- including lunch and training materials, excluding VAT

### **Registration**

Do you want to attend this course? Then send in the entry form *before April 26, 2012*.
