

Feed sampling

Description

In this training the feedstuff sampling protocols are discussed, both the theoretical context of feed sampling as well as feed sampling in practice.

The following subjects are dealt with in this course:

- feed sampling objective (tracability, analysis, product liability)
- method of feed sampling
- sampling materials
- automatic feed sampling
- feed sampling on location

Learning objective

At the end of the training the participants will know which protocols apply to their own working situation and how feed sampling is to be carried out in practice. The training is concluded with a certificate.

Target group

Intended for operators and quality employees in the feed sector.

Language

This course will be given in Dutch and/or English.
