1 Introduction

1.1 General

The GMP+ Feed Safety Assurance scheme (GMP+ FSA) has been developed since 1992. It was managed from 1992 up until 2009 by the Product Board Animal Feed, The Hague, The Netherlands. Since 2010, this scheme is managed by GMP+ International.

It is a scheme for assuring feed safety in all the links in the feed chain. It is also an international scheme, applicable worldwide.

The establishment and development of the scheme was primarily the result of demand from the subsequent links in the animal production chain for better control of feed safety. Another contributory factor was the damage caused by more and less serious contamination incidents.

In the initial phase the demand arose for better differentiation in an increasingly saturated European sales market for animal products. Since 1999, feed & food safety has been a top issue internationally both politically and commercially, because of serious incidents in the feed sector. Because of this, demonstrable assurance of feed safety has become a sales prerequisite.

The basic principle of the GMP+ FSA scheme is that the feed chain is part of the food production chain. Proper assurance of feed safety worldwide is a high priority. Companies must live up to their responsibilities and respond properly and convincingly to the needs of animal production. The GMP+ Feed Safety Assurance scheme is an aid to realise this.

1.2 Structure of the GMP+ Feed Safety Assurance scheme

The documents within the GMP+ FSA scheme are subdivided into a number of series. A description follows of these:

A		
General (framework) documents		These documents contain the requirements for participation in the certification scheme for companies and certification bodies (framework regulation, the use of logo's, etc.). This series also includes a general list of definitions and abbreviations.
Document	Code	Name
⇒ Standard	GMP+ Axx	e.g. GMP+ A3 <i>GMP+ Logo</i>

B
Normative documents

These documents contain the international standards and additional country notes for use by companies with respect to the various feed products and production phases including cultivation and industrial production, treatment and processing, collection, trade, means of transport, storage and transshipment.

C
Certification requirements

These documents contain the Rules of Certification including those for the approval of certification bodies and auditors, the frequency of audits, minimum audit time, assessment criteria, checklists, etc. There is also an explanation of how the supervision by certification bodies is implemented and of how GMP+ International supervises the certification process.

D
Interpretations and accompanying texts

In addition to the above-mentioned normative documents, there are also supporting documents in the D series including a list of frequently-asked questions, manuals and guidances with additional information.

All these documents are available through the website of GMP+ International (www.gmpplus.org).

The document in the present case is referred to as standard GMP+ A3 *GMP+ Logo* and is part of the GMP+ FSA scheme.

1.3 Scope and application of this standard

This standard contains the GMP+ logo as mentioned in GMP+ A1 *General Regulations*, section 6.

2 GMP+ FSA logo

From 1 January 2010 onward the approved certification bodies and the participants who have a license for it, are allowed to use the next logo. The colour and the language of the used logo must be equal to the original. In order to meet the wishes of the participants in the GMP+ FSA scheme, we are offering the logos in three variations: black and white, colour with a black background and colour with a purple background. You can make your own choice of whichever variation fits best in your publications. If you wish you can use the colours of your own company style. The original GMP+ logo is available behind the login on GMP+ International's website.

3 Phasing out logo's

Till 3 years after the transition from the Product Board to GMP+ International the following illustrations of the GMP+ logo in Dutch, German, English, French, Spanish and Italian are allowed to use. The use of the colour(s) is free to choice.
