

Newly authorized feed materials and other developments in FSP (June 2023)

Feed material	Remarks	As part of the risk assessment (RA)
Marigold flower powder (7.098)	New feed material (7.098)	Marigold flower powder
Yellow mealworm oil (9.075) Yellow mealworm protein meal (9.076) Yellow mealworm, dried (whole/meal) (9.077)	New feed materials (9.075; 9.076; 9.077)	Products from Yellow mealworm (Tenebrio Molitor)
Distiller corn oil (from ethanol production) refined (1.017)	Updated risk assessment. Relevant changes: 1- New feed material: 1.017 2- Updated flow chart: details 3 and new details 5 3- Updated list of processing aids 4- Updated table of hazards: add references for toxic substances at treatment /process	Bio-ethanol industry
Cocoa husks (2.011) Cocoa hulls (2.016)	Updated risk assessment. Relevant changes: 1- Updated feed material definition: 2.011 2- New feed material: 2.016 3- Updated flow chart: updated details 1, 2, 3 and 10	Cocoa industry
Feather, pig hair and pig hoofs protein, hydrolysed (9.009)	Updated risk assessment. Relevant changes: 1- Updated risk assessment name: "Feather protein, hydrolysed or feather, pig hair and hoofs protein, hydrolysed" instead of "feather protein, hydrolysed" 2- New feed material definition: 9.009 3- Updated flow chart: new option B (new pages, detail 3 and detail 4)	Feather protein, hydrolysed or feather, pig hair and hoofs protein hydrolysed.
Maize gluten (moist/liquid) (1.056)	Updated risk assessment. Relevant changes: 1- Updated feed material name, definition and new synonym: 1.056 2- Updated flow chart: details 2 and 5 3- Updated table of hazards: elimination of polyethylene (no realistic hazard); addition of T2/HT2 at reception	Maize starch industry

Newly authorized feed materials and other developments in FSP (June 2023)

Feed material	Remarks	As part of the risk assessment (RA)
Product rich in ribonucleic acid obtained from yeast cultured from paper industry (12.019) Yeast cell walls (from paper industry) (12.020)	Updated Risk assessment. Relevant changes: 1- Updated flow chart: details 3, 4 and 5 2- Updated table of hazards: new "references in process diagram".	Yeast Product from the paper industry
Buglossides seed Micronised/Milled (2.424)	Updated Risk assessment. Relevant changes: 1- New feed material: 2.424 2- Updated flow chart: detail 6	Product from buglossoides seeds
Mono- and diglycerides of vegetable fatty acids esterified with organic acid (13.105)	Updated Risk assessment. Relevant changes: 1- Updated flow chart: details 1	Mono- and diglycerides of vegetable fatty acids esterified with organic acid
D-Xylose from corncob (13.096)	Updated Risk assessment. Relevant changes: 1- Updated feed material synonym: delete mention to "Cat.68/203: 13.2.6"	Xylo- oligosaccharide and D-xylose from corncob
Filtercake from winterization (2.229)	Updated risk assessment. Relevant changes: 1- Updated feed material name and definition: 2.229	Sunflower oil oindustry
Feed beans, raw (3.045) Feed beans, toasted (3.102)	Updated risk assessment. Relevant changes: 1- Updated feed material name: 3.045 2- New feed material: 3.102	Feed beans products (from Phaseolus spp. or Vigna spp.)
Feed materials that are rumen protected by formaldehyde treatment	There is no change in the risk assessments themselves, the products will be on the Product List and can be produced safely. Note: Because of changes in legislation related to labour conditions related to formaldehyde, it is not clear anymore that a feed material that is rumen protected by formaldehyde treatment is allowed. Check the legislation in the country where the product is produced either traded. See for more detailed information newsletter 21 April 2023	-
