Welcome

This Feed Certification Scheme document helps you to provide feed safety worldwide. By meeting the requirements set by GMP+ International together with our GMP+ Community, we aim to help you get the feed certification you need. Please read the information in this document carefully.

Let’s make this work together!

1. Scope of this document

This document contains the assessment and certification criteria for performing audits at applicant organizations/GMP+ Certified Companies which will result in (re)certification for the GMP+ Feed Certification scheme, Feed Safety Assurance (FSA) module.

2. Normative reference(s)

The following documents, in whole or in part, are normatively referenced in this document and are mandatory to comply with. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

- ISO/IEC 17021-1:2015 Conformity assessment – requirements for bodies providing audit and certification of management systems.
- NPR-ISO/TS 22003:2013 Food safety management systems – requirements for bodies providing audit and certification of food safety management systems.
- F 0.1 Rights and Obligations.
- F 0.3 Scopes for certification
- CR 1.0 Acceptation Requirements.
- CR 3.0 Assessment and Certification for additional scopes.
3. Terms and Definitions

For GMP+ definitions see F 0.2 Definition list. Throughout this document the terminology “through the Certification Body” is used indicating that all activities performed by critical-, non-Critical Locations and outsourcing party are conducted under the responsibility/liability of the GMP+ accepted Certification Body.
4. Principles

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>

5. Process requirements

5.1. Pre-certification activities

5.1.1. Application

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
<tr>
<td>Article 9.1.1</td>
</tr>
<tr>
<td>ISO/TS22003:2013</td>
</tr>
<tr>
<td>Article 9.2.1</td>
</tr>
</tbody>
</table>

In addition relevant details of the applicant organization as mentioned under 9.1.1. B) of the ISO/IEC 17021-1:2015 are:

- Gatekeeper files,
- Multi-site certification,
- Number of employees,
- Number of products.
- An up-to-date group structure of the applicant organization, including ultimate beneficiary ownership and management overview, as well as a statement indicating the applicant organization, its ultimate beneficiary owner’s or its management’s involvement in businesses similar to the applicant organization business, if any to confirm that the applicant organization complies with chapter 5 of the F 0.1 Rights and Obligations.

5.1.2. Application review

<table>

5.1.3. Certification agreement

During the validity of a GMP+ certificate/temporary acceptance, the Certification Body must have a legally enforceable unique certification agreement with each applicant.
organization/GMP+ Certified Company. Certification agreement issued by a Critical-/Non-Critical Location and outsourced party must comply with the template approved by the Certification Body in question.

The Certification Body must be aware that:

a) the certification agreement must always be secured with the applicable legal entity.
b) These agreements must be concluded for the provision and description of the applicable certification activities in accordance with the GMP+ Feed Certification scheme.
c) The Certification Body must not exclude activities, processes, products and services from the scope of certification when these can have an influence on the feed safety of the end products as defined in the scope to certification.
d) It is not allowed to secure conditions in the certification agreement which are conflicting with GMP+ requirements.
e) It is not allowed to determine and impose additional requirements to the applicant organization/GMP+ Certified Company other than specified in the GMP+ Feed Certification scheme, unless specified in the internal procedure of the GMP+ Certified Companies.

The following GMP+ specific requirements must be secured in the certification agreement:

f) The applicable scope(s)/standard(s) names covering GMP+ certification.
g) The minimum obliged audit duration per scope(s)/standard(s) per type of audit are as stated in Annex 2, referring to Annex 2 is insufficient. It is not permitted to deviate from the minimum obliged audit duration by way of invoicing based on re-calculation. If a longer audit duration is applicable then this can be done in consultation with the applicant organization/GMP+ Certified Company. In case of Multi-site certification the minimum obliged audit duration as mentioned in Annex 4 must apply.
h) Each multi-site location must be secured with its GMP+ registration number.
i) The use of the GMP+ logo in accordance with the F 0.1 Rights and Obligations.
j) The stipulation (if applicable), that, in case of a determined nonconformity of a permitted level of a contaminant, the GMP+ Certified Company is obliged to submit an EWS notification in accordance with the R 1.0 Feed Safety Management Systems Requirements.
k) The obligated cooperation of the applicant organization/GMP+ Certified Company with witness audits, parallel audit (as stated in CR 1.0 Acceptation requirements) and repeat audits performed in cooperation with GMP+ International.

l) The forwarding of audit reports/audit checklists to GMP+ International.

m) The possibility to terminate the certification agreement before the end of the certification cycle.

### 5.1.4. Audit team assignment

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
<td>Article 9.2.2.</td>
<td></td>
</tr>
</tbody>
</table>

Related to Article 9.2.2.1.2 the additional requirement as stated in article 4.3.6 of the CR 1.0 Acceptation requirements additionally applies.

#### 5.1.4.1. Rotation of auditors

Once the certification cycle of 3 years is finalized, a new auditor has to be assigned through the Certification Body for the start of the new certification cycle. Should an alternative auditor not be available, an exemption can be made by the Certification Body and the period can be extended for a maximum of 1 extra certification cycle. The decision must be motivated and documented.

### 5.1.5. Audit plan

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
<td>Article 9.2.3</td>
<td></td>
</tr>
<tr>
<td>ISO/TS22003:2013</td>
<td>Article 9.1.2</td>
<td></td>
</tr>
</tbody>
</table>

In addition for multi-sites see Annex 4.

### 5.2. Certification process

#### 5.2.1. Audits

##### 5.2.1.1. General

A Certification Body accepted by GMP+ International under the GMP+ Feed Certification scheme is entitled to certify companies through the Certification Body who have an interest
for 1 or more GMP+ scopes for the feed sector as specified in GMP+ Feed Certification scheme.

The applicant organization/GMP+ Certified Company must cooperate fully with audits as specified in this document. Auditing may include taking samples and laboratory testing.

Through the Certification Body, the assessment will take place by means of an audit at the applicant organization/GMP+ Certified Company for conformity with the general criteria as specified in Annex 1 and the additional assessment criteria in the checklists. The following audits are provided for:

a. Initial certification audit
b. Announced surveillance audit
c. Unannounced surveillance audit
d. Recertification audit.
e. Expansion audit

In addition, special audits can also be carried out (see article 5.2.2.).

The certification cycle has a maximum duration of 3 years. During the certification cycle all GMP+ requirements must be verified by the Certification Body. The minimum obliged audit duration and the frequency are determined in Annex 2.

In case a GMP+ Certified Company changes during the certification cycle their activities to another location the new location must be audited by the Certification Body. This is applicable for production, transport and storage & transshipment. The GMP+ audit duration must apply. It is up to the Certification Body to decide if the initial certification- or surveillance audit must be performed.

5.2.1.2. Opening meeting

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
</tbody>
</table>

5.2.1.3. Initial certification audit

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
<tr>
<td>ISO/TS22003:2013</td>
</tr>
</tbody>
</table>
A GMP+ certificate may or may not be granted, depending on whether the assessment criteria of this document are met. An Initial certification audit must be conducted within 3 months after concluding an certification agreement with the applicant organization. The interval between stage 1 and stage 2 cannot be longer than 4 months.

5.2.1.3.1 Temporary acceptance

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
<td>Article 9.3.1</td>
</tr>
<tr>
<td>ISO/TS22003:2013</td>
<td>Article 9.2.3.1</td>
</tr>
</tbody>
</table>

It is possible, on the basis of a positive assessment of the feed safety management system documentation, to issue a temporary acceptance (maximum 4 months) as part of an initial certification audit at a company which is starting its GMP+ activities.

Regarding the location of the assessment in addition to article 9.2.3.1.3 of the ISO/TS22003 the following applies:

a) When a company carries out production and/or storage and/or transport activities, then part of the assessment of the quality documentation must take place at the company location(s) so that the infrastructural facilities can be verified.

b) If the company carries out other activities, then part of the assessment of the quality documentation may take place at the company location(s) if the Certification Body considers this necessary.

The entire certification process must be finished within the validity of the temporary acceptance including the updating of the GMP+ company database (including status and certificate dates) by the Certification Body.

Companies not eligible for a temporary acceptance are:
1. Transferred from another Certification Body.
2. Previously GMP+ certified or temporary accepted.

5.2.1.4. Surveillance audits

The requirements to be verified during surveillance audits can be performed based on a risk assessment of the Certification Body, where feed safety must have the highest priority. The procedure to determine the requirements to be verified during the surveillance audits must be documented.
The first surveillance audit must be executed each 12 months, plus and minus 2 months, after the certification decision date.

The second surveillance audit must be executed each 24 months, plus and minus 2 months, after the certification decision date.

5.2.1.4.1 Announced surveillance audits

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
</tbody>
</table>

In addition to article 9.6.2.2, the following applies:

a) In case of the scope Road Transport, the requirements in Annex 6 can be applicable.
b) In case of paper trade within the scope Trade, the requirements in Annex 6 can be applicable.

5.2.1.4.2 Unannounced surveillance audit

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
</tbody>
</table>

Certification Bodies must not schedule the unannounced surveillance audit within 2 months prior to or following the execution of other audits (initial certification, recertification and announced surveillance audits). Every twelve months, each GMP+ Certified Company can specify 15 days in that year during which the unannounced surveillance audit cannot be performed. If not indicated in advance the unannounced surveillance audit cannot be refused. It is up to the Certification Body to decide whether the legitimate motivation to postpone the unannounced surveillance audit is justified.

Helpful tip:
Examples of legitimate postponing of the unannounced surveillance audit are:

1. The Certification Body cannot visit the site of the GMP+ Certified Company because its flooded or there are other extreme weather conditions.
2. The location of the GMP+ Certified Company is closed (yearly closing, maintenance, holiday) or the location of the GMP+ Certified Company is not conducting GMP+ activities (seasonal work).
The following prior notice periods to perform the unannounced surveillance audit are applicable:

- GMP+ Certified Companies (producers) located in the Netherlands: not allowed.
- GMP+ Certified Companies (producers) located in Germany: 1 working day.
- GMP+ Certified Companies (producers) located in other countries in Europe: 2 working days.

There are several options:

A: Mandatory unannounced surveillance audit

The unannounced surveillance audit is mandatory for GMP+ Certified Companies located in the Netherlands, Germany and in other countries of Europe certified for one of the following scopes:

- Production of compound feed (incl. petfood),
- Production of premixtures,
- Production of feed additives,
- Production of feed materials (incl. petfood).

The unannounced surveillance audit will replace one of the announced surveillance audits during the certification cycle and must be registered in the GMP+ database.

This unannounced audit for GMP+ certified companies (producers) located in other countries of Europe* must be secured in the contract at the latest 31st December 2020.

*Other countries in Europe:
Albania, Andorra, Austria, Belarus, Belgium, Bosnia Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Greece, Hungary, Ireland, Iceland, Italy, Kosovo, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, Moldavia, Monaco, Montenegro, Nord – Macedonia, Norway, Poland, Portugal, Romania, San Marino, Serbia, Slovenia, Slovakia, Spain, Sweden, Switzerland, Ukraine, United Kingdom, and Vatican City.

Option B: Voluntary unannounced surveillance audit

Relevant requirements must apply

| ISO/IEC 17021-1:2015 | Article 9.6.2 |

a) In case of the scope Road Transport, the requirements in Annex 6 can be applicable.
b) In case of paper trade within the scope Trade, the requirements in Annex 6 can be applicable.
Those who apply for the voluntary unannounced audit, will be obliged to participate during the whole certification cycle. The unannounced surveillance audit will replace one of the announced surveillance audits during the certification cycle and must be registered in the GMP+ database.

B1): For European* GMP+ Certified Companies (including GMP+ Certified Companies located in the Netherlands and Germany) certified for the following scope(s):

- Trade,
- Storage & Transshipment,
- Transport of feed, road- and rail transport,
- Affreightment,

Helpful tip:
European GMP+ Certified Companies (including GMP+ Certified Companies located in the Netherlands and Germany) who are certified for 1 of the production scopes and therefore obligatory participate in the unannounced surveillance audit for the production scope, can decide whether they want to apply the unannounced surveillance audit also for 1 of the scopes mentioned under option B1.

B2) For all GMP+ Certified Companies outside Europe certified for any GMP+ scope. The unannounced audit can on a voluntary basis be applied for all scopes in any country.

5.2.1.5. Recertification audit

| Relevant requirements must apply | ISO/IEC 17021-1:2015 | Article 9.6.3 |

A GMP+ certificate may or may not be granted, depending on whether the assessment criteria set out of this document are met including the updating of the GMP+ company database (including status and certificate dates) by the Certification Body. If a recertification audit is not carried out before the expiry of the period of validity of the certificate, then an initial certification audit must be carried out. The GMP+ Certified Company is in the intervening period not GMP+ certified.
5.2.1.6. **Expansion audit**

If a GMP+ Certified Company wishes to expand the range of his already granted certification with an additional scope(s) and the expansion cannot wait until the next audit, the application and determination of the possibility whether or not to approve the expansion must be assessed through the Certification Body.

An expansion audit (stage 1 and stage 2) must only be focused on activities for which expansion is applicable.

As a result of positive assessment of the expansion the Certification Body has to add the additional scope(s) to:

- a GMP+ certificate
- GMP+ company database
- GMP+ certification agreement with the GMP+ Certified Company.

5.2.2. **Special audits**

The following special audits can be applicable, assessment must be done in accordance with Annex 1.

5.2.2.1. **Stricter supervision**

If 1 or more Major nonconformities are observed through the Certification Body, the GMP+ Certified Company may be placed under stricter supervision:

a) The cost of this audit is at the expenses of the GMP+ Certified Company.
b) This audit is in addition to the normal audit cycle.
c) The stricter supervision audit will take place for the period determined in Annex 1, within a period of 3 months.
d) Assessment will be based, but not limited to the established major nonconformity.
e) A Major Nonconformity can also be handled administratively based on conformity measures formulated by the GMP+ Certified Company.

If 1 or more Critical nonconformities are observed through the Certification Body, the GMP+ Certified Company must at least be placed under stricter supervision:

f) The cost of these audits is at the expenses of the GMP+ Certified Company.
g) These audits are in addition to the normal audit cycle.
h) The stricter supervision audits will take place for the period determined in Annex 1, with a minimum of 3 months and a maximum of 6 months.

i) Assessment will be based, but not limited to the established critical nonconformity.

j) One stricter supervision audit must be conducted on-site. It is up to the Certification Body to decide if further stricter supervision audits are necessary. This decision must be motivated and documented.

5.2.2.2. Repeat audit

The reason for a repeat audit may be an EWS alert, complaints or incidents, or other special circumstances. In principle the repeat audit is aimed at these reason(s) but can also be aimed at all requirements of the GMP+ Feed Certification scheme.

a) GMP+ International may ask the Certification Body to carry out a repeat audit on short term in principle in the presence of a GMP+ International auditor and/or a technical expert.

b) The repeat audit must be carried out by a GMP+ auditor. The involved Certification Body must motivate the choice of the GMP+ auditor and document its decision.

c) The deadline will be assessed per case but ultimately determined by GMP+ International. The audit will be on-site. In addition, physical and/or administrative checks and a sampling may be carried out.

d) The required appointments and communication of the repeat audit will be made with the GMP+ Certified Company by the Certification Body in consultation with GMP+ International.

e) In principle the costs of the repeat audit will be at the expenses of GMP+ International. However, if it appears that 1 or more Critical or Major nonconformities are observed, the costs will be charged to the GMP+ Certified Company.

5.2.3. Extraordinary events

Extraordinary events or circumstances affecting Certification Bodies. If the Certification Body and/or Critical Location is confronted with an extraordinary event, it is obliged to follow the below guidelines based on the IAF Informative Document for Management of extraordinary events or circumstances affecting, Certification Bodies and GMP+ Certified Companies and which are described as follows:

A. The GMP+ Certified Company or business location does not exist because it is destroyed by terrorist acts or acts of war; or is taken over by soldiers or rebels and/or pandemic flooding, earthquake, or other man-made and natural disasters. The
Certification Bodies, Critical/Non-Critical Location and/or Outsourcing Party is informed by the management of the GMP+ Certified Company or business location or receives the information from another source(s). The Certification Bodies, Critical/Non-Critical Location and/or Outsourcing Party is obliged to search for confirmation of the fact from a reliable source. After confirmation, the Certification Body withdraws the GMP+ Certificate and GMP+ International is informed directly in writing, including all the relevant details.

B. The GMP+ Certified Company or business location is closed by its head office because the region is not safe. The management of the company of the head office informs the Certification Body, Critical/Non-Critical Location and/or Outsourcing Party. The Certification Body withdraws the GMP+ Certificate and GMP+ International is informed directly in writing, including all the relevant details.

C. The GMP+ Certified Company or business location cannot be audited because the region is not safe and decided by the Certification Body, Critical/Non-Critical Location and Outsourcing Party, that the region is not safe to be visited by an auditor (decision must be based on IAF guidelines) the Certification Bodies, Critical/Non-Critical Location and Outsourcing Party must follow d)

D. If the audit frequency cannot be met and assuming that sufficient evidence was collected to provide confidence that the certified management system of the GMP+ Certified Company is effective, considerations may be given to postpone the surveillance or recertification audit for a period not exceeding 3 months. Otherwise the GMP+ Certificate has to be suspended by the Certification Body. During the period of suspension the surveillance or recertification audit must be carried out, otherwise the certificate has to be withdrawn by the Certification Body.
5.2.4. Identifying and Recording audit findings

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
</tbody>
</table>

If the applicant organization/GMP+ Certified Company does not comply with the requirements of the GMP+ Feed Certification scheme, the measures and sanctions as specified in Annex 1 are applicable.

Multi-Site certification:
If nonconformities are observed at the main office, these nonconformities apply to the whole GMP+ Certified Company or quality community. If nonconformities are observed at the level of a location, this can influence the location and/or the main office. This is to be assessed by the Certification Body.

Audit findings of the individual multi-sites must be considered indicative of the entire system and correction must be implemented accordingly.

5.2.5. Closing meeting

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
</tbody>
</table>

5.2.6. Audit report

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
<tr>
<td>ISO/TS22003:2013</td>
</tr>
</tbody>
</table>

For all type of audits, reporting will take place, in accordance with the model reports stated in Annex 3.

Within a maximum of 8 weeks following the execution of the audit on site, the Certification Body will send the GMP+ audit report/checklist to the applicant organization/GMP+ Certified Company. For the scope Trade to Livestock Farms the final checklist is sufficient.

The Certification Body must provide a written GMP+ audit report/checklist for each multi-site location being audited. It is also possible to integrate it into the GMP+ audit report of the main office. If this is the case an overview must be included in the GMP+ audit report of the main office showing when all the locations / companies were visited.

If GMP+ International requests the GMP+ audit report/checklist then the Certification Body will make these available immediately. In the event of a repeat audit GMP+ International must receive the GMP+ audit report/checklist within 5 working days.
For all type of audits (including documentation assessment) the following information must be entered into the GMP+ database and shared with GMP+ International within a maximum of 8 weeks following the execution of the audit on site:

- Audit findings/checklist;
- Nonconformities (if applicable);
- Final assessment of the applicant organization/ GMP+ Certified Company.

In any event a GMP+ audit checklist must be uploaded in the GMP+ database for all multi-site locations. Only a description of nonconformities is sufficient. Evidence for conform requirements can also be added to the GMP+ audit report/checklist of the main office.

For a repeat audit deviations from this are permitted, in consultation with GMP+ International.

### 5.2.7. Review

The Certification Body must have a process to conduct an effective review of all GMP+ audit reports/checklists, including, that

a) the information provided by the audit team is sufficient with respect to the certification requirements and the scope for certification;

b) for any type of nonconformities, it has reviewed, accepted and verified the correction and corrective actions;

c) that assessment of the applicant organization/GMP+ Certified Company took place in accordance with Annex 1.

The conclusion and date of the review by the technical reviewer must be documented.

The technical reviewer must perform the review independent, meaning that the technical reviewer could not have been part of the GMP+ audit team.

### 5.2.8. Certification decision

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
<th>Article 9.5</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
<td></td>
</tr>
</tbody>
</table>

In addition to article 9.5.2 of the ISO/IEC 17021-1:2015:

a) For any type of nonconformities, the Certification Body has reviewed, accepted and verified the correction and corrective actions;

b) Assessment of the applicant organization/GMP+ Certified Company took place in accordance with Annex 1.
c) The assessment and decision of a Certification Body must be demonstrably based on objective evidence of conformity and non-conformity obtained.

In addition to article 9.5.3.2 of the ISO/IEC 17021-1:2015:
  • This is applicable for Critical- and Major nonconformities

5.2.9. Certificate/Temporary Acceptance

5.2.9.1. Certificates
A certificate with a maximum period of validity of 3 years may be issued through the Certification Body, calculated from the date of a positive certification decision. The duration of the GMP+ certificate must not exceed the validity of the certification agreement. Within 8 weeks following the execution of the audit on site, the certificate will be sent through the Certification Body to the applicant organization/GMP+ Certified Company.

For multi-site location the following applies:
1. A certificate will be issued per certified multi-site location, or in an Annex linked to the certificate of the main location.
2. It must be clear where the multi-site location is certified for according 1st and 2nd column of the table in Annex 5.
3. The main office must at least be certified for the scopes covering all scopes of the multi-site locations.

Helpful tip:
If the GMP+ main office is certified for the scopes production of compound feed and trade in feed and the multi-site locations have a transport scope then the main office must also be certified for this scope because the management and control of the feed safety management system of the multi-site construction is centrally controlled at the GMP+ main office.

5.2.9.2. Temporary acceptance
A temporary acceptance with a maximum period of validity of 4 months may be issued by the Certification Body. The duration of the temporary acceptance must not exceed the validity of the certification agreement.
However, if, during the initial certification audit (stage 2), the applicant organization does not appear to comply the GMP+ requirements conform Annex 1 then the temporary acceptance must be withdrawn.

For multi-site location the following applies:

a) A temporary acceptance will be issued per multi-site locations or mentioned in an Annex linked to temporary acceptance of the main location.

b) It must be clear were the multi-site location is accepted for according 1st and 2nd column of the table in Annex 5.

### 5.2.9.3. Certificate/Temporary Acceptance templates:

The Certification Body must put the following text on the certificate or temporary acceptance:

A) Text for every certificate Feed Safety Assurance or temporary acceptance

<table>
<thead>
<tr>
<th>Name of the Certification Body:</th>
</tr>
</thead>
<tbody>
<tr>
<td>GMP+ International registration number of the Certification Body:</td>
</tr>
<tr>
<td>Certificate / Temporary Acceptance</td>
</tr>
<tr>
<td>GMP+ FSA logo</td>
</tr>
</tbody>
</table>

Name, address, location of the GMP+ Certified Company

(Address where GMP+ activities take place)

GMP+ International registration number of the GMP+ Certified Company

**FIXED SECTION**

=name CB= declares that there is justifiable confidence that the GMP+ scope(s) =as mentioned in F. 03 Scope for certification= at the GMP+ Certified Company =name of GMP+ Certified Company= comply with the applicable requirements and conditions of the GMP+ Feed Safety Assurance Module 2020.

**FREE SECTION**

See F. 03 Scopes for certification

Registered office of the Certification Body  Accreditation Mark (if applicable)

Certificate number / temporary acceptance number

Begin date and end date of certificate / temporary acceptance
In addition:

a. The data of the GMP+ Certified Company must exactly be the same as registered in the legal business registration of the GMP+ Certified Company (for example Chamber of Commerce/registration at competent authority, tax/vat number).

b. It is mandatory to show the GMP+ FSA logo and the Accreditation Mark (if applicable) on the certificate.

c. It is not permitted to use the GMP+ FSA logo or accreditation mark on a temporary acceptance. In addition, the document may not be called a “certificate” but must be designated as a “temporary acceptance”.

d. It is not permitted to use the logos of Critical Location, non-Critical Location and outsourced party on the GMP+ certificate and temporary acceptance other than the GMP+ accepted Certification Body.

e. The begin date of the certificate/temporary acceptance is a date which is in any event equal or after the date of the positive certification/temporary acceptance decision.

f. In case of expansion of scopes the end date of the valid GMP+ certificate may not be extended. The Certification Body can also grant the GMP+ Certified Company a new GMP+ certificate for the additional scope.

g. It is not permitted to specify brand names in any way whatsoever on the certificate or temporary acceptance.

5.3. Suspension or withdrawal of a certificate/Temporary Acceptance

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
</tbody>
</table>

If it is established that a GMP+ Certified Company/temporary accepted company no longer complies with the requirements, sanctions must be imposed immediately, through the Certification Body, in accordance with Annex 1.

The auditor must report a Critical nonconformities as specified in Annex 1 immediately to the responsible GMP+ coordinator and/or authorized person.
The responsible GMP+ coordinator and/or authorized person must inform GMP+ International within 2 working days of non-compliance with the requirements by using the form Audit Finding Notification Critical Nonconformity in case of:

- A critical nonconformity,
- Suspension of the GMP+ certificate,
- Withdrawal of the GMP+ certificate.

The GMP+ Database must be adapted by the Certification Body to status: “suspended or withdrawn” with reason: “does not meet the requirements” within 2 working days. When the Certification Body has determined a critical nonconformity it is not allowed to withdraw the GMP+ Certificate with the reason of withdrawal “on own request”. Once the certificate has been suspended or withdrawn the company cannot participate in the GMP+ Feed Certification scheme under any Gatekeeper Protocol.

GMP+ International is entitled to publish the suspended/withdrawn certificates.

5.4. Transfer to another Certification Body

<table>
<thead>
<tr>
<th>Relevant requirements must apply</th>
</tr>
</thead>
<tbody>
<tr>
<td>ISO/IEC 17021-1:2015</td>
</tr>
</tbody>
</table>

During the validity of a GMP+ certificate, a GMP+ Certified Company is entitled to transfer to another Certification Body. Such transfer is subject to the following conditions:

5.4.1. Pre-transfer review

The Certification Body is obliged to make available all relevant information/data to the accepting Certification Body/Critical Location in question.

The accepting Certification Body/Critical Location must carry out a review of the GMP+ certification of the GMP+ Certified Company. This review must cover the following aspect and its findings must be documented:

a) Confirmation that the activities of the GMP+ Certified Company falls within the accepted scope of the Certification Body and/or Critical Location.

b) Reason for transfer.
c) An evaluation of the last (re)-certification reports and any unclosed nonconformity that may arise from them. This evaluation can include other relevant documentation, regarding the (re)-certification process i.e. notes, checklists, etc.

d) Confirmation that the GMP+ Certified Company has no unfulfilled contractual obligations with the departing Certification Body.

**5.4.2. Certification process during transfer**

After successful pre-transfer review the following conditions apply:

a) The accepting Certification Body, Critical/Non-Critical Location, Outsourcing Party has to conclude a GMP+ Certification Agreement with the applicant organization (see article 5.1.3.). A new certification cycle must be started. An Initial certification audit must be carried out.

b) Open nonconformities issued by the departing Certification Body should be closed before transfer, otherwise the nonconformities must be closed by the accepting Certification Body/Critical Location during the Initial certification audit.

c) A new certificate must be issued. It is not allowed to transfer a GMP+ Certificate from the departing Certification Body to the accepting Certification Body. A Certification Body is not allowed to accept transfer of a Company which GMP+ Certificate has been suspended or withdrawn. Except for withdrawn on “own request”.

**6. Exclusion of GMP+ International liability**

GMP+ International has no liability whatsoever with respect to the assessment of applicant organizations/GMP+ Certified Companies through the Certification Bodies. The Certification Bodies in question will indemnify GMP+ International in this respect.

**7. Tariff**

The Certification Body will use its own tariff. On behalf of GMP+ International, through the Certification Body, relevant tariff as listed in GMP+ CR4 *Tariffs* are charged.
8. Disputes between Certification Bodies and GMP+ certified companies

Disputes between Certification Bodies and applicant organization/GMP+ Certified Companies with respect to the assessment will initially be handled in accordance with the disputes regulation of the Certification Body. If this does not lead to a solution then the dispute can be handled in accordance with the F 0.5 Dispute Procedure.
Annex 1: Assessment criteria and sanctions for audits GMP+ FSA

Nonconformities are to be classified on the basis of:

- The general assessment criteria as mention in this Annex
- The specific assessment criteria as shown in the checklists.

The sanctions specified must be imposed as a minimum. A Certification Body is allowed to impose stricter sanctions. If in this table is mentioned certificate it also applies for the temporary acceptance.

</tr>
<tr>
<td>Certificate cannot be issued</td>
<td>Lifting of *level 2: Certificate can be continued only possible if the Certification Body can close the critical nonconformity during stricter supervision audit (see Art. 5.2.2.1) *Level 3. Certificate must be withdrawn: at least 1 year excluded from participation in the GMP+ Feed Certification scheme, as well as all Gatekeeper Options</td>
<td></td>
</tr>
<tr>
<td>GMP+ Certified Companies</td>
<td>* do not cooperate in (planning/conducting) audits by Certification Bodies and/or GMP+ International (not applicable for IA)</td>
<td>Certificate cannot be issued</td>
</tr>
<tr>
<td>* do not comply with GMP+ requirements structural nature and feed safety is adversely affected</td>
<td>Lifting of *level 1: Certificate can be continued only possible if the Certification Body can close the critical nonconformity during stricter supervision audit (see Art. 5.2.2.1)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>*Level 2: Certificate must be withdrawn: at least 1 year excluded from participation in the GMP+ Feed Certification scheme, as well as all Gatekeeper Options</td>
<td></td>
</tr>
</tbody>
</table>

Sanctions can be applied starting at any level.
Annex 2: Frequency and Audit duration

**Frequency**
Audits must be carried out in accordance with the following cycle.

![Audit Cycle Diagram]

Audit implementation cycle: 3 years. 

This is a qualitative representation of the audit cycle for the implementation of GMP+ audits.

The audit duration is expressed in days, 1 day is 8 hours. Audit duration includes stage 1 & 2 (including preparation, reporting, etc.). The tables in this Annex provide mandatory minimum audit duration. When properly documented and justified a reduction to the minimum obliged audit duration can be issued to a less complex organization measured by number of employees, a simple production process, size of the organization, product volume (including a limited number of products), seasonally being active, etc. The GMP+ Certified Company must receive an adapted offer/certification agreement. GMP+ International will check the reasoning and assess this during the annual Certification Body audit.

The Certification Body cannot issue audit duration reduction if:

- It exceeds more than 30% of the minimum obliged audit duration.
- During the validity of the GMP+ certificate an audit duration reduction already exists and no changes in activities have occurred.
- During the last 3 audits at the GMP+ Certified Company 1 Critical non-conformity was established.
• During the last 3 audits at the GMP+ Certified Company 1 Major non-conformity was established with a structural character or the Major non-conformity resulted in feed safety hazard.
• During the last 3 audits at the GMP+ Certified Company twenty Minor non-conformities were established.

Through the Certification Body audit duration reduction can only be granted on the initial certification audit if the Certification Body can demonstrate that they certified the company for another scheme as mentioned in this Annex and/or an equivalent scheme as mentioned in TS 1.2 Purchase and properly documented and justified.

Audit durations are not allowed to be used for re-calculation of the minimum obliged audit duration, except when during the initial certification audit as stated above.

This temporary deviation from the audit duration is valid as long as:
  a. no changes take place in the activities and organisation of the GMP+ Certified Company
  b. no changes are made to this Annex regarding audit duration.
  c. The GMP+ Certified Company does not transfer to another Certification Body. If the GMP+ Certified Company transfers to a new Certification Body, the Certification Body has to assess if an audit duration reduction can be issued.

In the event of repeat audits and stricter supervision audits as specified in article 5.2.2, the period of time will apply which is considered necessary through the Certification Body or GMP+ International.

Duration for audits may increase if EWS, complaint, exemptions, incidents, etc, have to be investigated by the Certification Body.

The ranking must be applied based on the ISO/TS 22003:2013 requirements. In addition the following GMP+ audit scope ranking is applicable:
  a. Production of Compound Feeds (Category D)
  b. Production of Premixtures (Category D)
  c. Production of Feed additives (Category K)
  d. Production of Feed materials (Category D)
  e. Production of Pet food (Category D)
  f. Trade in feed (Category F)
  g. Storage and transshipment of Feed (Category G)
h. Transport of Feed (Category G)
i. Affreightment of Feed (Category G)

For the calculation of the obliged minimum initial certification audit duration (IA) for a single site the following formula will be used:

\[ Ts = TD + TH1 + TH2 \text{ (if applicable)} + TFTE \]

Where:
- **Ts**: minimum initial certification audit duration
- **TD**: is the basic on-site audit duration, in days;
- **TH1**: is the number of audit days for additional HACCP studies;
- **TH2**: is the number of audit days for additional GMP+ scopes;
- **TFTE**: is the number of audit days per number of employees;
**Minimum initial certification audit (ICA) duration: \( T_s = TD + TH1 + TH2 \) (if applicable) + TFTE**

<table>

</tr>
</tbody>
</table>

¹The minimum audit duration is established for the audit which includes only 1 HACCP study. A HACCP study corresponds to a hazard analysis for a family of products/services/processes with similar hazards and similar production technology and, where relevant, similar storage technology (i.e. similar family of products/services/processes: compound feed for pig, cattle, etc., in this case 1 HACCP study could be applicable), (i.e. for a company with both production and trade in its scope, 2 HACCP studies could be applicable).

²Without the use of critical feed additives and/or critical veterinary medicinal product the audit duration may be reduced up to 0,25 days per site.

³Applicable for pet food.

⁴For road transport the affreightment of road transport is included.

⁵ISO9001 and/or ISO22000 scope feed in combination with ISO22002-6 and/or IFS food and/or BRC production and/or FSSC 22000
**Calculation of the surveillance and recertification audit duration:**

For production of compound feed (D), premixtures (D) and feed additives (K), the minimum surveillance audit duration must be equal to the ICA duration. For the production of feed materials (D), Trade in Feed (F), Storage & Transshipment of Feed (G), Transport of Feed (G), Affreightment of Feed (G), the minimum surveillance audit duration must be 2/3 of the ICA duration. For all scopes the minimum recertification audit duration must be equal to the ICA duration.

**1. Additional Site:** A site who has a legal or contractual link with the main office of the organization and be subject to a common management system, which is laid down, established and subject to continuous surveillance and internal audits by the central office. This means that the central office has rights to require that the sites implement corrective actions when needed in any site. Where applicable this should be set out in a formal agreement between the central office and the sites.

2. Number of employees is including part-duration workers calculated as percentage of FTE.

3. A forage trader is a GMP+ Certified Company which as a direct supplier to the livestock farmer takes care of the delivery of simple arable and horticultural crops (or parts thereof) harvested exclusively in Europe, which after any simple processing such as pressing or packaging but in an unchanged state are intended as feed for productive livestock. The trade in feeds from the foodstuffs industry is limited to a maximum of five products.

</tbody>
</table>

Audit details:
- Initial certification audit
- Announced surveillance audit
- Unannounced surveillance audit
- Recertification audit
- Expansion audit
- Repeat audit
- Stricter supervision
- Documents review (in the event of a temporary acceptance)
- Other;

Date of document assessment:
**2 Scope GMP+ Certified Company/locations**

Specify the type of GMP+ Certified Company and its activities. Describe the products and quantities. Specify the nature and the numbers of personnel (permanent, temporary) per location. Describe the organisational structure. Also take note of other companies on the same site or under the same holding (with similar names or incompatible activities). Provide a brief summary of the whole process for example purchasing, production process, storage, sales and transport of main and subsidiary product streams (focusing on the relationship with the activities covered by the application). Also indicate whether the GMP+ Certified Company applies the Gatekeeper principle and describe the activities.

**3 Audit objectives**

The audit objectives must describe what is to be accomplished by the audit and must include the following topics:

a) Determination of the conformity.

b) Evaluation of the ability of the Quality Management System to ensure the GMP+ Certified Company’s organisation meets applicable statutory, regulatory and contractual requirements.

c) Evaluation of the effectiveness of the Quality Management System to ensure the GMP+ Certified Company’s organisation is continually meeting its specified objectives.

**4 Which topics have been assessed and concluded**

In general it must be clear in the report what has been assessed and what was the conclusion of the auditor.

**5 Summary of the assessment and a general conclusion**

Start with a standard phrase such as “The GMP+ Certified Company was visited for a surveillance audit of the GMP+ requirements. The GMP+ Certified Company was checked for the requirements of the applicable GMP+ scopes”.

*Indicate whether the nonconformities observed in the previous audit have been resolved.*

Make a summary per location and in total.
Give a brief summary of the general impression of the quality system of the GMP+ Certified Company. Possible postscript after a final assessment by the technical reviewer: review of additional documents and follow-up.

### Summary of the assessment and the number of audit nonconformities observed

<table>
<thead>
<tr>
<th>Location</th>
<th>During previous audit</th>
<th>During audit visit</th>
<th>At final assessment</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Number of audit nonconformities</td>
<td>Number of audit nonconformities</td>
<td>Number of audit nonconformities</td>
</tr>
<tr>
<td></td>
<td>Critical</td>
<td>Major</td>
<td>Minor</td>
</tr>
</tbody>
</table>

Audit conclusion: the GMP+ Certified Company meets/fails to meet requirements of the GMP+ standard. Measures and sanctions: conformity audit, repeat audit, stricter supervision (including period of time), suspension, withdrawal.

### 6 Appendices

Checklists used, report forms for audit nonconformities.
Note: non-conformities observed must also be recorded in the English/German or Dutch language.

Annex to the report NCR form: **yes/no**
Annex 4: Multi-site certification

1. General:

Multi-site certification is possible:

a. at a GMP+ Certified Company with a main office with 100% subsidiaries, or
b. at a group of companies which have joined together as a quality community.

A Multi-site organization does not have to be a unique legal entity, but all sites must have a legal or contractual link with the main office of the organization and be subject to a common management system, which is laid down, established and subject to continuous announced surveillance and internal audits by the central office. This means that the central office has rights to require that the sites implement corrective actions when needed in any site. Where applicable this should be set out in a formal agreement between the central office and the sites.

Multi-site certification is not to be used if various independent companies have joined together in a branch organisation, union, federation, association, via an independent consultancy office or similar.

Multi-site certification is not permitted for the scopes (Country Notes included):
(D*) Production of compound feed,
(D*) Production of premixtures,
(D*) Production of feed materials,
(K*) Production of feed additives.

Multi-site certification is permitted for all scopes (Country Notes included) of:
(F*) Trade in feed
(G*) Storage and Transshipment of feed
(G*) Transport of feed
(G*) Affreightment of feed

*See reference ISO/TS 22003:2013 Table A.1

Helpful tip:

a. If, for example, a group contains multiple production locations and storage locations, the production locations in this group cannot be certified under multi-site but for storage locations this is possible.
1.1. General requirements:

1.1.1. General

a. All locations fall under the same quality system which is managed centrally (referred to hereafter as the main office). This quality system complies with the relevant GMP+ standards and there must be compliance at all locations with the relevant GMP+ requirements (see also the guidance under Certification).

b. The same methods and procedures are used at all the locations.

c. Corrective actions may be imposed from the main office on all branches.

d. There must be a written agreement between the participating subsidiaries and the main office. This agreement must be signed by all the participating parties and the signed agreement must be present at the main office and available to the auditor. The statement will include at least:
   1. a commitment by the GMP+ Certified Company to the main office that it will comply with the requirements set in the quality system.
   2. that corrective actions imposed by the main office are binding
   3. that the above applies to all feed activities (and therefore those which are carried out more or less independently).

e. All the locations are included in the programme of internal audits. The internal audit must be performed 1 x per 12 months at all locations.

f. The main office must show that it is able to collect data from every location, to analyse the data and, where necessary, to implement changes with respect to:
   1. System documents and changes
   2. Management review
   3. Complaints handling
   4. Corrective actions
   5. Planning of internal audits and improvement measures.

g. In case of unprocessed goods all sites must be located in the same country or in the bordering regions of neighbouring countries.

1.1.2. Certification

Before an initial certification audit can take place, a unique certification agreement/certification agreement template between the main office and the participating companies and also the internal audit report must be able to be handed over to the Certification Body for review.

Helpful tip:
If the main office is certified for a production scope and the multi-site locations are certified for a transport scope and/or a trading scope, the main office must also be certified for this scope (transport and/or trade) because the management and control of the feed safety management system lies centrally at the main office.

In an initial certification audit, the sampling program applies including the main office to be audited before a certificate can be issued. The main office will be audited annually.
If a new location joins a GMP+ Certified Company or a group of companies, a verification of the relevant subjects must take place at the main office and the new location must be audited on the basis of the sampling program.

On the basis of the sampling program, the Certification Body must randomly select the sites to be audited according to the following:

- The use of multi-site certification for organizations with a main office and at least 20 multi-sites. The sampling must be at the ratio of 1 site per 5 multi-sites with a minimum of 20 multi-sites within the certification cycle.
- The use of multi-site certification for organization with a main office and less than 20 multi-sites. \( \frac{1}{3} \) of the multi-sites will be audited annually. All multi-sites will be audited during the certification cycle.

The selection of the multi-sites is the responsibility of the Certification Body and must take into account the results of the internal audit as performed at the main office and the GMP+ activities performed at various multi-site locations.

**Number of sites to be audited within a 3 year certification period when Multi-site certification is used:**

<table>
<thead>
<tr>
<th>Total number of sites above 20</th>
<th>1-20</th>
<th>21</th>
<th>22</th>
<th>23</th>
<th>24</th>
<th>25</th>

<td>0,50</td>
</tr>
<tr>
<td>Multi-site location with storage and/or transport and/or limited trading</td>
<td>0,50</td>
<td></td>
</tr>
</tbody>
</table>

*By the number of employees is meant the sum of the number of employees (including part time employees as percentage of FTE) per audited branch per year.
1.2. Additional requirements:

The following additional requirements apply to a group of companies:

1.2.1. Transport

A tractionair can only be certified under multi-site requirements if the tractionair carries out all the transport of feed for the main office exclusively. If this is not the case the tractionair must be independently certified.

2. General for TS 3.1 Trade to livestock farms

For companies which apply TS 3.1 and which have extra storage locations and/or extra sales points or sales outlets, it is possible to make use of this option of multi-site certification.

Two types are distinguished for Distribution Centre (DC):

a. DC acts as the only supplier of the brokers. In this case DC can be seen as a part of the sales points and therefore falls under certification for TS 3.1. Multi-site certification is possible.

b. DC is one of the suppliers of the brokers. DC acts much more independently with respect to the brokers (and vice versa) as mentioned under a. In this case DC is seen as an “ordinary” trader and must apply at least GMP2020. Multi-site certification is not possible.

2.1. General requirements

2.1.1. General

To be eligible for multi-site certification under TS 3.1 Trade to livestock farms the GMP+ Certified Company must comply with the following criteria:

a. The GMP+ Certified Company has a main office from which activities are planned and directed

b. The GMP+ Certified Company has a network of storage locations and/or sales points

c. All storage sites and/or sales points fall under the same quality system which is managed from the main office. This quality system must be based on the GMP+ standard and all the locations must meet the GMP+ requirements;

d. The same methods and procedures are used at all the locations.

e. All the locations are included in the programme of internal audits

f. Corrective actions may be imposed from the main office on all storage locations and/or sales points

g. The GMP+ Certified Company must demonstrate that it is able to collect data from every location, to analyse the data and, where necessary, to make changes with respect to:

1. System documents and amendments

2. Complaints handling

3. Corrective actions
4. Planning of internal audits and improvement measures

h. If the main office is not the owner of the extra storage locations and/or extra sales points, the main office must have a written statement from the GMP+ Certified Companies (storage locations and/or sales points) in which they undertake:

1. to sell GMP+ certified feeds directly to the livestock farmer. Selling to other GMP+ certified companies is not permitted;
2. that the purchase of GMP+ certified feeds will only take place via the main office;
3. to provide full cooperation to the main office with respect to the activities which are described in all the above points of this option.

This statement must be signed by all the brokers participating in this Multi-site certification and the signed declaration must be present at the main office and must be available for assessment by the auditor.

In addition, all the GMP+ Certified Companies which have signed a declaration must be known to the Certification Body. The size of the random sample can be determined based on this data.

2.1.2. Certification

In the event of Multi-site certification for TS 3.1 the audit frequency for the extra storage locations or extra sales points (with the exception of the main office) may be reduced in accordance with the following schedule where each location must be visited at least once per 3 years.

Initial certification audit / recertification audit / announced-/unannounced surveillance audit

<table>
<thead>
<tr>
<th>Number of locations /sales points (without main location)</th>
<th>1</th>
<th>2</th>
<th>≥3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Number of locations to be visited</td>
<td>1x / 3 years</td>
<td>1x / 3 years</td>
<td>33% / 3 years</td>
</tr>
</tbody>
</table>

Minimum duration to be spent per visit in days:

<table>
<thead>
<tr>
<th>Extra storage location</th>
<th>Minimum audit duration per visit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Extra retail outlet</td>
<td>0.125</td>
</tr>
<tr>
<td>Extra retail outlet</td>
<td>0.188</td>
</tr>
</tbody>
</table>

As all storage locations and/or sales points must work in accordance with the same methods and procedures and under the same quality system, the review of the documentation can remain limited to verification of the presence of up-to-date documentation and the completeness of the documentation with respect to the location.
Annex 5: Announced surveillance audit – not at GMP+ Certified Company location

Annex 5A:
For the scope road transport of feed an announced surveillance audit may also take place at another location than the registered offices of the GMP+ Certified Company.

The following requirements apply:

a. The GMP+ Certified Company falls into the category: 1-5 FTE
b. The GMP+ Certified Company does not have its own working area
c. The GMP+ Certified Company offers at least 1 loading compartment which is used for GMP+ transport (trailer / semi-trailer, etc.) for checking;
d. All the required GMP+ documentation for the previous 12 months must be present for a proper assessment, including:
   1. Quality manual
   2. Cleaning validations
   3. Internal audit reports
   4. Management review
   5. Journey sheets
   6. Waybills
   7. Order sheets
   8. Specifications of cleaning and disinfectant agents, etc.

e. The alternative location is suitable for carrying out audits:
   1. Checking of loading compartments causes no hazardous situations for those involved or bystanders
   2. If there is a collective check (multiple companies are invited for audit at the same time) then the privacy of individual companies must be guaranteed.

Annex 5B:
For the scope trade in feed “paper trade” an announced surveillance audit may also take place at another location than the registered offices of the GMP+ Certified Company.

The following requirements apply:

a. The alternative location is suitable for carrying out audits.
b. All relevant GMP+ requirement documentation must be available for assessment, including:
   1. Quality manual
   2. Invoicing
   3. Internal audit reports
   4. Management review
   5. Order sheets
   6. Contract
