

Newly authorized feed materials and other developments in FSP (July 2024)

Feed material	Remarks	As part of the risk assessment (RA)
Quillaja saponaria, powder (7.050)	New risk assessment and new feed material (7.050)	Quillaja saponaria, powder
Cell hydrolysate from <i>Vibrio natriegens</i> (12.030) Single cell protein from <i>Vibrio natriegens</i> (12.029) Single cell protein from <i>Priestia flexa</i> (12.028)	New risk assessment and new feed materials (12.028; 12.029; 12.030)	Single cell protein from <i>P. flexa</i> / <i>V. natriegens</i> and Cell hydrolysate from <i>V. natriegens</i>
Glycerine, crude (from the production of biodiesel) (13.030) Glycerine, refined (from the production of biodiesel) (13.060)	Updated risk assessment. Relevant changes: 1- New possible processing aids: enzymes, methanol. 2- Updated flow chart: details 2,3 and new detail 5	Glycerine, crude and refined (from biodiesel)
By-product of fermentation of solid materials with fungi (12.017)	Updated risk assessment. Relevant changes: 1- Updated feed material definition: New fungi included	By-product of fermentation of solid materials with fungi
Mono- and diglycerides of vegetable fatty acids esterified with organic acids (13.105)	Updated risk assessment. Relevant changes: 1- Updated feed material definition: 13.105 2- Updated flow chart: detail 2	Mono- and diglycerides of vegetable fatty acids esterified with organic acids
Lecithinized palm fat, prilled (2.430)	Updated risk assessment. Relevant changes: 1- New feed material: 2.430 2- New possible processing aid: soya bean lecithin. 3- Updated flow chart: new detail 7.6 and updated detail 25.	Palm (-kernel) oil industry
Wheat bran (1.151)	Updated risk assessment. Relevant changes: 1- Updated feed material definition: 1.151 2- Updated flow chart: detail 5	Wheat milling products
Whey powder (8.020)	Updated risk assessment: Relevant changes: 1- New processing aid: calcium carbonate (CaCO ₃) 2- Updated Flowchart: detail 16.1.	Dairy sector (cow's milk)

New authorized feed materials and other developments in FSP (July 2024)

Feed material	Remarks	As part of the risk assessment (RA)
(Sugar) beet molasses, betaine rich, liquid/dried (4.053)	**Updated feed material definition to include maximum natural betaine content.	Beet sugar industry
Algae extract (7.029)	**Updated feed material definition to include following information: "Not authorized as feed material in EU. Check legal status in other countries"	Algae extract
Barley, extruded (1.018)	**Updated feed material definitions to specify the method used on rumen protection process.	Barley milling products
Soya beans, extruded (2.167)		Soya beans, extruded / expanded
Distillers grains and solubles, dried (1.002d)	**Updated feed material definition to delete mention to rumen protection.	Bio-ethanol industry
High-cellulose fraction of sunflower meal (2.298)		Sunflower oil Industry
High-protein low cellulose fraction of sunflower meal (2.297)		
Peas, extruded (3.026)		Pea processing industry
Rape seed expeller feed (2.280)		Rape seed oil industry
Rape seed meal feed (2.278)		
Maize germ oil, crude (1.067)	Updated feed material name to include mention to germ. Updated synonyms.	Maize oil industry
Maize germ oil, refined (1.066)
